Senior Software Engineer with a focus on front-end development, experienced in agile collaboration, and dedicated to continuous learning and professional growth. Demonstrates a strong track record of delivering high-quality software solutions that meet user and stakeholder needs.

Skills

Development Languages

- TypeScript
- JavaScript
- SCSS
- C#

Frameworks & Libraries

- React.js
- .Net
- Material UI
- Ant Design
- Bootstrap

Tools & Platforms

- AWS
- Azure
- Webpack
- GitHub
- Jest

Experience

2/2022 – 3/2023

Senior Software Engineer / Vyne Dental

- Worked on Vyne Trellis, the hub for the dental billing software, developing new features and enhancing existing ones using React, TypeScript, Ant Design, Azure, and AWS.
- Reduced technical debt by identifying areas for improvement, creating tickets for work to be done, and refactoring old JavaScript code to TypeScript.
- Separated spaghetti code into modular components and code, resulting in a cleaner and more maintainable codebase.
- Mentored junior developers, fostering a collaborative and supportive learning environment within the team.

2/2021 – 2/2022

Senior Software Engineer / Purple

- Worked on promotions and sales for Purple products, including mattresses, bedding, and apparel, on their live customer-facing website, playing a key role in high-traffic periods like Black Friday and Christmas.
- Increased sales revenue through successful promotions and improved developer and user experience by adding features to enhance UX, such as redesigning the pre-checkout cart.
- Collaborated with Promotions, Design, Product, QA, and Project Management teams in an agile environment, participating in daily standups, sprints, and handoffs to ensure seamless coordination.
- Utilized technologies such as JavaScript, SCSS, Vue.js, and Craft CMS to create and implement front-end content for both new and existing products.

9/2019 – 2/2021

Software Engineer/ CardWorks

- Worked on the internal ticketing system, an essential application for tracking activity and streamlining workflows for Data Analysts.
- Maintained and improved the user experience of the site by refining the front-end interface and optimizing performance.
- Collaborated closely with the Data Analyst team, ensuring that their needs and requirements were met while continuously enhancing the application.
- Utilized technologies such as Angular, .Net, C#, TypeScript, MSSQL Server, and SCSS to deliver a robust and efficient solution.

Education

MAY 2014

Bachelor's Degree, Economics / Idaho State University

Gained a deep understanding of market dynamics and principles of business and marketing.

Certifications

JAN 2023

AWS Certified DevOps – Professional

Demonstrated proficiency DevOps in cloud-based environment using AWS.

OCT 2022

AWS Certified Developer – Associate

Demonstrated proficiency in developing, deploying, and debugging cloud-based applications using AWS.
